

Concierge Medicine provides an alternative in healthcare with a more personalized and customized service.

- Cuts down on individuals wait time
- Shorter appointment times
- House calls by doctor to patient
- Service is more focused on patient, doctor has less patients
- 24 hour a day physician availability
- Immediate appointments (Convenience)
- Discussion, analysis and plan of care for each individual patient
- Medicine mal practice has gone down with doctors who specialize in concierge medicine
- Enhanced care
- Doctor's work load is more manageable
- More practical for most practitioners, doctors see less patients and thus increase time spent with individual patients
- Increase physician pay with upping the number of hours worked or patients seen
- Eliminates third party interference
- Customers are more satisfied
- High service quality
- Can also work with patients on preventative health and dietary counseling
